JOIN US FOR A DELICIOUS MEAL AND A MEMORABLE EVENING

-----**FEATURING**-----

Michael Clancy

Michael Clancy was hired by USA Today newspaper to photograph a spina bifida corrective surgical procedure. It was to be performed on a 21 week old unborn baby in utero at Vanderbilt University Medical Center. As a doctor asked Clancy what speed of film he was using, out of the corner of his eye he saw the uterus shake but no one's hands were near it. Suddenly, an entire arm thrust out of the opening, then pulled back until just a little hand was showing. The doctor reached over and lifted the hand, which reacted and squeezed the doctor's finger. One of the photos would be seen around the world and raise new questions about the sanctity of human life and partial birth abortion.

At the banquet we will honor:
